What is the one primary reason why you chose to take this course?

20 responses

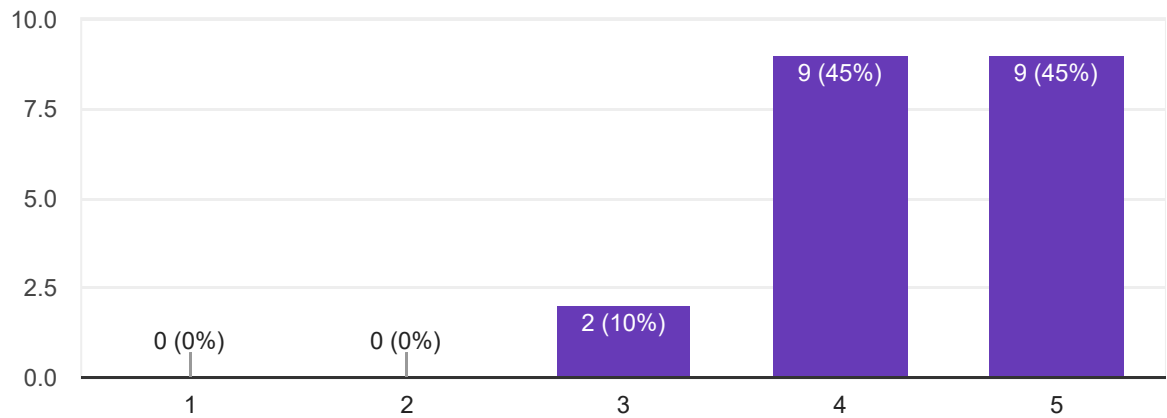

When did you take this course?

20 responses

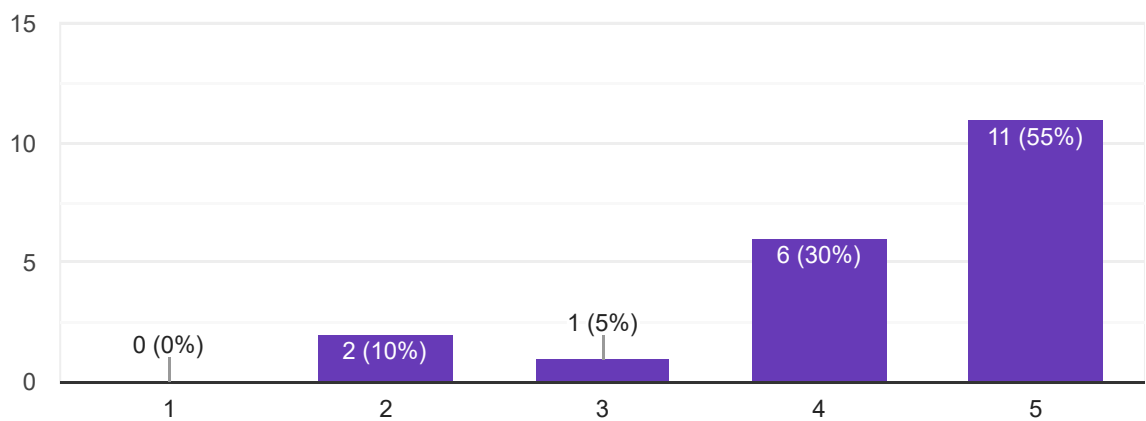

The course followed the syllabus well.

20 responses

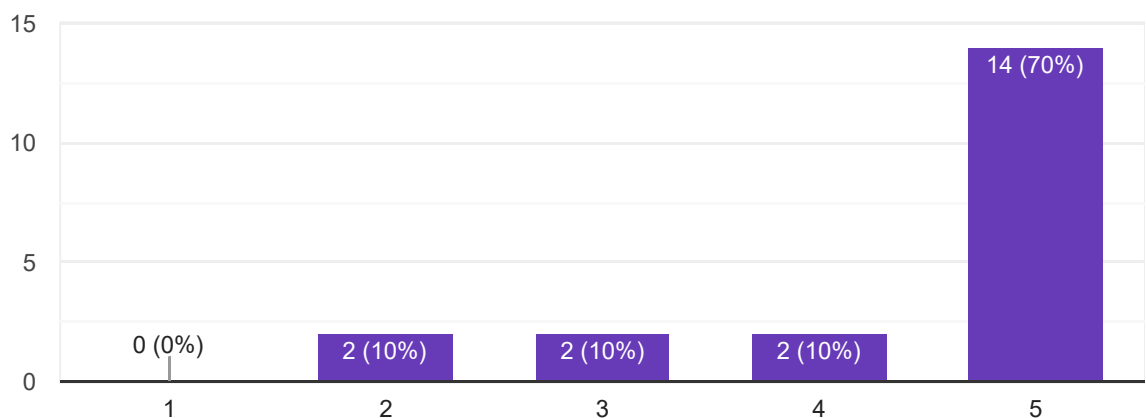

The learning outcomes were clearly defined.

20 responses

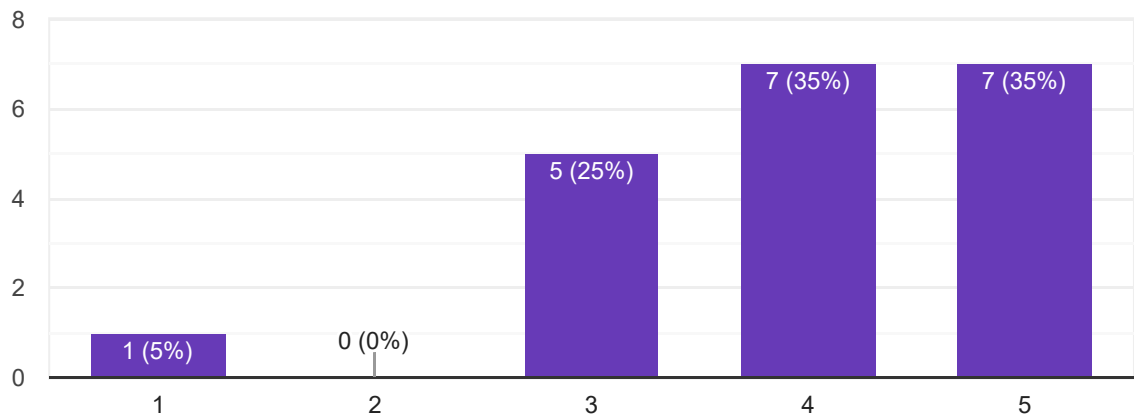

The instructor presented course material in a clear manner that facilitated understanding.

20 responses

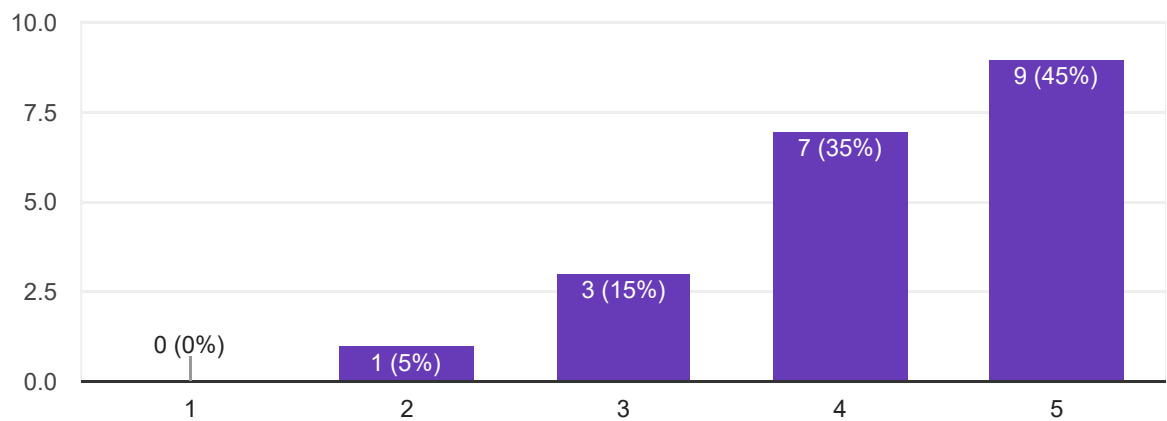

The instructional materials (i.e., readings, handouts, study guides, lab manuals, multimedia, software) increased my knowledge and skills in the subject matter and I could easily complete my assignments.

20 responses

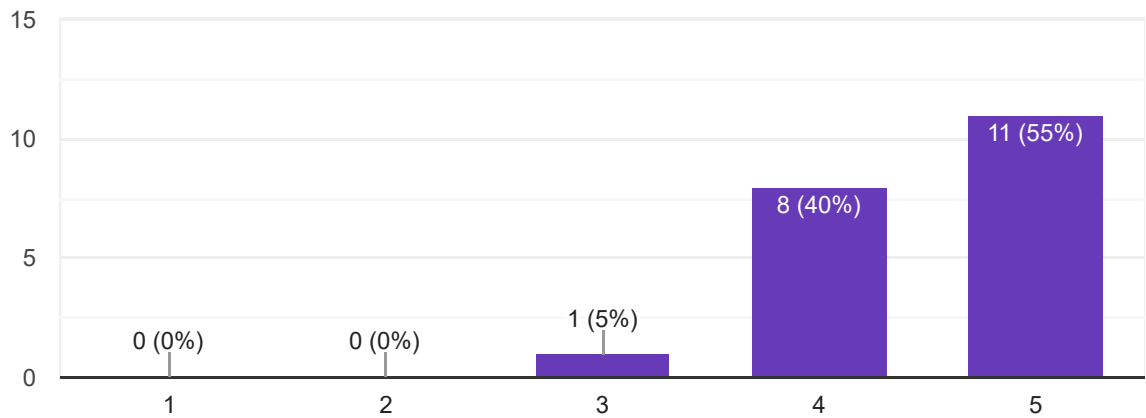

The assignment questions were clearly defined.

20 responses

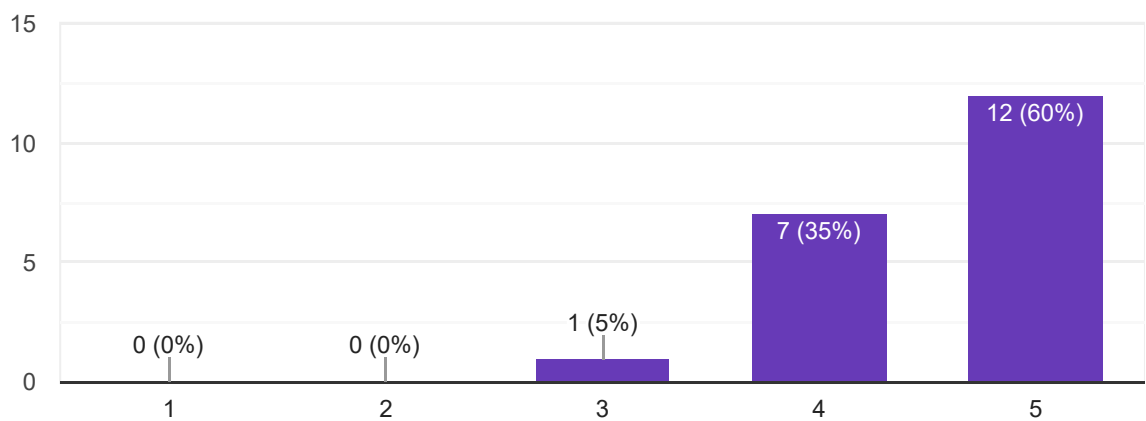

Assignments were reflective of the course content.

20 responses

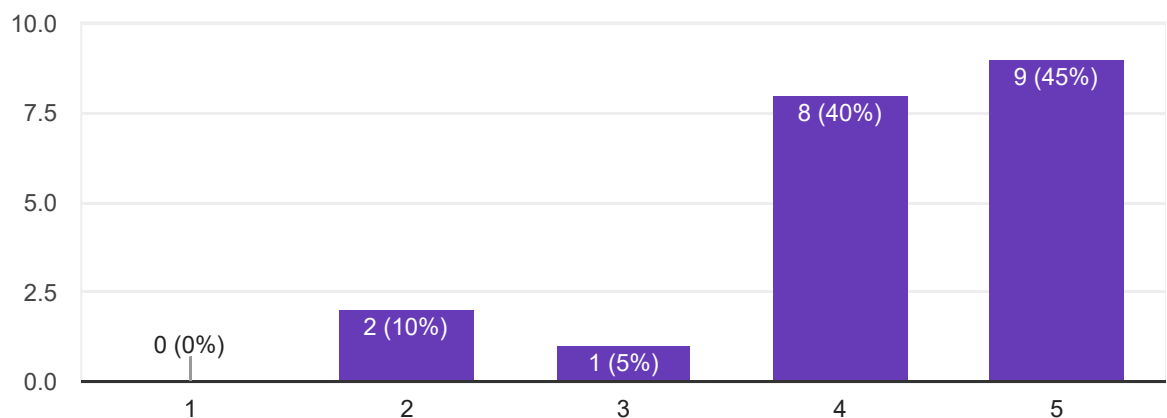

The instructor grades consistently with the evaluation criteria.

20 responses

The course workload and requirements were appropriate for the course level.

20 responses

Do you have any specific recommendations for improving this course?

9 responses

Perhaps more focus on the code architecture would have been nice.

Keep it up!

Maybe adding additional links for more information. For example at the end of each assignment in the document add a link to a resource that would help the student. Geeksforgeeks have nice explanations about the algorithms or Youtube videos would be great as well. Researching the algorithm is an obligation for the student, but I saw some of my studentmates were quite confused where to look for clear algorithm explanations.

Overall I think this is one of the most useful courses at Fontys within my 4 years. Georgiana is definitely one of the nicest teachers who is really dedicated to helping the students

In the beginning, for me it was too easy and fast to do stuff. However towards the end it became more difficult and took more time to complete assignments. However, I really liked the fact that you just have a single assignment that you need to complete in order to pass, i.e. there is only 1 deadline and no exam. It allowed me to focus on the subject whenever I had free time thanks to the huge time before the final deadline

In the beginning, for me it was too easy and fast to do stuff. However towards the end it became more difficult and took more time to complete assignments. However, I really liked the fact that you just have a single assignment that you need to complete in order to pass, i.e. there is only 1 deadline and no exam. It allowed me to focus on the subject whenever I had free time thanks to the huge time before the final deadline instead of forcing me to do it each week before a certain deadline.

One of the most challenging, but as well useful and fun courses I have done in Fontys.

Sometimes I had trouble with understanding the explanations of the lab manual. Maybe if there was more explanation in it, it would be great.

I think it's a great course with awesome teachers, but for the amount of hours student needs to spend, it pays out too little ECs. So perhaps, either decrease workload or increase ECs.

It is easy to get stuck on something for a while and you always need the output from the previous assignment for the next one. Perhaps it would be good to have some assignments that don't depend on each other so you don't get too far behind schedule.
